Products Available From Follett Library Resources

Accelerated Reader Program and Quizzes

Accelerated Reader™ (AR™) is the most popular and successful reading product of all time. AR's advanced technology helps you:

- Make essential reading practice more effective for every student.
- Personalize reading practice to each student's current level.
- Manage all reading activities including read to, read with, and independent reading.
- Assess students' reading with four types of quizzes: Reading Practice, Vocabulary Practice, Literacy Skills, and Textbook Quizzes.

STAR Early Literacy™

Assess general readiness, phonemic awareness, phonics, and other early reading skills so you can provide more effective instruction during the most critical years of your early readers' literacy development. Compared to paper assessments, STAR Early Literacy™ is faster, less costly, and provides better and more extensive results—in approximately 10 minutes. Plus, you can repeat the STAR Early Literacy assessment throughout the year at no additional cost.

- Accurately and reliably assess 41 skills in 7 key early literacy domains.
- Screen students for placement, diagnostic assessment, progress monitoring, growth measurement, and outcomes assessment.
- Streamline testing and eliminate test anxiety with computer-adaptive technology.
- Save money by administering assessments as often as you like at no additional cost.

STAR Reading™

Determine the reading level of each student, measure individual and class growth, and forecast results on standardized tests with the accurate, reliable, and efficient assessment students can complete in approximately 10 minutes. In the past, waiting for assessment results meant weeks or months of missed opportunities to assure that you're maximizing reading practice. With STAR Reading™, there's no more waiting for assessment results. You'll have all the information you need immediately!

- Assess students' reading levels in approximately 10 minutes.
- Receive accurate, reliable, norm-referenced reading scores including grade equivalents, percentile ranks, and normal curve equivalents.
- Determine the appropriate level of challenge for each student to personalize practice and individualize instruction.
- Predict results on high-stakes, standardized tests, including ITBS, CAT, SAT, and TerraNova.

English in a Flash™

Now, you can help your English language learners quickly acquire the vocabulary necessary for success in everyday life—and in school. English in a Flash™ helps students learn the sounds, vocabulary, and basic grammar of English very quickly so they can catch up academically with their peers who grew up speaking English.

With English in a Flash's, students learn English the same way children learn their native language—from the bottom up. Moving seamlessly from Basic Interpersonal Communication 6 Skills (BICS) to Cognitive Academic Language Proficiency (CALP)

- Acquire English language proficiency in as little as half the time of what is typical in language learning classes.
- Focus on vocabulary while learning grammatical structures implicitly.
- Move quickly from learning English to learning in English.
- Maximize exposure to comprehensible input.
- Improve listening, speaking, reading, and writing in English.

AR BookGuide™

With AR BookGuide™, you can easily search the AR quiz library, create reading lists for your students, and even order quizzes to match the books in your library! Managing your AR quiz and book collection has never been easier!

- Quickly access helpful details about every book in the AR quiz library.
- Identify and sort new titles (Web-based technology updates your software with new quiz titles each week.)
- Develop custom reading lists based on criteria such as author, interest, book level, point value, and more.
- See profiles on each book including a brief description, number of pages, ISBN, LCCN, date published, series, topics, and more.
- Import book levels and point values for each book so AR BookGuide™ information matches Accelerated Reader on every title.
- Instantly see ATOS™ levels for every book.
- Print labels simply by using their call number.

Professional Development

Renaissance Learning™ offers a variety of professional development options and resources to help you get the most from your implementation. All are designed to help you transform your classroom and accelerate learning.

What's New For School Year '09-'10?

Renaissance Place Real Time

* **Screening**—Set cut scores and quickly determine which students are meeting benchmark in STAR Early Literacy, STAR Reading, and STAR Math.

* **Progress Monitoring**—Select progress monitoring goals best suited for each student and monitor using the new Screening and Student Progress Monitoring reports in STAR Early Literacy, STAR Reading, and STAR Math.

* **Intervention**—Access new benchmarks for intervention in MathFacts in a Flash or use the new MathFacts in a Flash dashboard to determine where intervention is needed most. Group students according to their intervention for easy reporting in STAR Early Literacy, STAR Reading, and STAR Math.

* **Successful Reader Data Management**—Those using new Successful Reader for intervention can now manage your Book Club data separately from your guided independent reading data.

* **Live Chat Support**—Now, you won't have to interrupt class or walk down the hall to get answers to your software questions. With our new Live Chat Support, you can interact with a knowledgeable Renaissance Learning support representative without ever leaving your computer.

* **Instant Software Updates**—With Renaissance Place Real Time, your software resides in our secure enterprise-class data center. This ensures that you always have the newest content, features, and enhancements. What's more, by eliminating the need to maintain your own software, you'll save time, reduce energy costs, and free your technical staff to focus on other important issues.

For more information on Renaissance Place Real Time features for specific products, click on the links to the left.

If you currently host your Renaissance Place software in our enterprise-class data center, you will receive all of the value-added benefits of Real Time at no extra charge. This upgrade will occur automatically with no action required on your behalf.

AR BookFinder

AR BookFinder, the web-based book searching, free online tool from Renaissance Learning, has been updated to incorporate the following new features:

- The ability for users to see book ratings! Book ratings are based on how students have rated the book in the Accelerated Reader software. The book ratings feature will be updated on a weekly basis. The search results feature has also been updated to allow for sorting by rating.
- Users who own AR BookGuide can now see their call number information in the My BookBag Report.

Accelerated Reader ENTERPRISE

With Accelerated Reader ENTERPRISE™, you get all this:

- Accelerated Reader Enterprise Software that runs on a Web-based server, which can be accessed by any Macintosh® or Windows® computer on your network.
- Accelerated Vocabulary Software to help you maximize vocabulary acquisition and build excitement for learning new words.
- Free Hosting for Your Initial Subscription Period. Renaissance Learning™ will host your software at no charge to you for up to one year. You'll have no worries about software performance, accessibility, or maintenance. We take care of it for you (new Renaissance Place™ customers only).
- Access to More Than 120,000 Accelerated Reader Quizzes—including all the Reading Practice (in English and Spanish), Recorded Voice (in English and Spanish), Vocabulary Practice, and Literacy Skills Quizzes—and all the new quizzes as they are created. Visit www.renlearn.com to view our extensive selection.
- 9 Hours of Web-based Professional Development to help you ensure a successful implementation of your Accelerated Reader software (new Accelerated Reader customers only).
- Unlimited Access to Renaissance Training Center™ where you can learn tips on program usage and helpful hints on getting started—available 24 hours a day, 7 days a week.
- Expanded Expert Support Plan that gives you access to the industry's leading technical support team. At last, all the answers you need are just a phone call or a mouse click away.
- Automatic Software Upgrades—Your Accelerated Reader Enterprise package includes all updates and upgrades at no additional charge.

Are you looking to implement Accelerated Reader, but have a small school or only want Accelerated Reader for a few students. . . Then consider the new web-based Accelerated Reader Starter Kit.

Accelerated Reader Web-based Starter Kit

| | | | |
|---|---------------|------------|------------------------------|
| Accelerated Reader Starter Kit | #81737C | \$684.00 | One-time school fee |
| Accelerated Reader Starter Kit Annual Student Fee | #81761C | \$1,181.00 | For a student capacity of 50 |
| Accelerated Reader Starter Kit Additional Student Fee | #87621C | \$12.45 | For each additional student |

- Includes Accelerated Reader web-based program
 - Includes all content for AR (including textbook quizzes)
 - Hosting is included in the annual student fee.
 - Includes 3 months of implementation coaching in addition to the 2 Getting Started Webinars.
- Professional development for the Starter Kits will be in the form of three months of implementation coaching. After the kit is purchased, the teacher will be contacted by a Renaissance Place Coordinator (RPC) who will work with them to complete all the software set up steps. Coaches will introduce key processes and classroom best practices to ensure a successful implementation.

STAR Reading

Web-based Reading Assessment Software For Grades 1-12

Using STAR Reading periodic progress-monitoring software, you can assess students' reading progress in grades 1–12. STAR Reading helps you determine the reading level of each student, measure individual and class growth, and forecast results on standardized tests. Students can complete the computer-adaptive assessment in approximately 10 minutes, and you get accurate, reliable, norm-referenced scores immediately.

STAR Reading has been validated with a nationally representative sample of more than 60,000 students (with an extremely high test-retest reliability score of .94) and is highly correlated to state and national standardized tests.

STAR Reading Software runs on a Web-based server, which can be accessed by any Macintosh or Windows computer on your network in much the same way you connect to a Web site on the Internet. Online Help and Software Manuals to help you run STAR Reading easily and effectively.

Districtwide Management and Reporting Access gives you and others throughout your district convenient access to all your STAR Reading data and reports from any Web-connected computer, anytime.

Extended Expert Support Plan including remote installation with 90 days of purchase, and unlimited support. Automatic Software Updates and Upgrades. Your STAR Reading subscription package includes all updates and upgrades at no additional charge (Does not include major updates including normative updates).

Remote Transfer of Student Data from existing versions within 90 days of purchase (for current STAR customers).

STAR Reading 1.x to Renaissance Place Norms Upgrade..... #81042P \$633.00 Per School
A norm upgrade would be required for any desktop version under 2.0 that is being upgraded to Renaissance Place.

STAR Early Literacy

Web-based Diagnostic Assessment For Grades PreK – 3rd

Now, assessing the early literacy progress of your pre-K through 3rd grade students is fast, accurate, and easy. STAR Early Literacy is the breakthrough, computeradaptive assessment that students can complete in approximately 10 minutes. You receive immediate results that help you intervene faster and provide effective instruction during the most critical years of literacy development.

Receive quality data. More than 450 schools and 50,000 students nationwide were used to validate the content.

STAR Early Literacy Software runs on a Web-based server, which can be accessed by any Macintosh or Windows computer on your network in much the same way you connect to a Website on the Internet.

Online Help and Software Manuals help you run STAR Early Literacy easily and effectively.

Districtwide Management and Reporting Access gives you and others throughout your district convenient access to all your STAR Early Literacy data and reports from any Web-connected computer, anytime.

Extended Expert Support Plan includes remote installation within 90 days of purchase, and unlimited support.

Automatic Software Updates and Upgrades. Your STAR Early Literacy subscription package includes all updates and upgrades at no additional charge (Does not include major updates including normative updates).

Includes Remote Transfer of Student Data from existing versions within 90 days of purchase (for current STAR customers).

| STAR Early Literacy Annual Service & Support Fee..... | #81008P | \$1.05 | Per Student/Per Yr. |

Annual minimum per school of 203 students

English in a Flash

Now, you can help your English language learners quickly acquire the vocabulary necessary for success in everyday life—and in school. English in a Flash helps students learn the sounds, vocabulary, and basic grammar of English very quickly so they can catch up academically with their peers who grew up speaking English.

At last, you can help students:

- Acquire English language proficiency in as little as half the time of what is typical in language learning classes.
- Focus on vocabulary while learning grammatical structures implicitly.
- Move quickly from learning English to learning in English.
- Maximize exposure to comprehensible input.
- Improve listening, speaking, reading, and writing in English.

Conversational Vocabulary - Students learn conversational vocabulary that helps them communicate effectively with friends, classmates, and teachers.

Content-Area Vocabulary - Students also learn content-area vocabulary that's necessary for success in language arts, math, biology, chemistry, history, geography, and other subjects.

Once students have learned the vocabulary in a lesson, those words are combined into short phrases, sentences, and dialogs. Students don't spend valuable time studying the rules of grammar. Instead, students learn grammatical structures the same way they learned them in their native language—through meaningful exposure.

Onsite and Remote Professional Development

Professional Development is available two ways: you can receive such instruction onsite at your facility and remotely via telephone and Web-based instruction. Professional development service packages are customized to help you maximize your implementation needs and software training requirements. All sessions can be scheduled in convenient hourly increments. This provides you with the greatest opportunities for learning the research-proven “Best Practices” developed by Renaissance Learning.

Once you’ve selected a service package option, an Accelerated Reader Implementation Consultant will work with you to plan and schedule the hours and customized topics based on key factors such as educational setting, learner needs, teacher experience, and current familiarity with Accelerated Reader.

Onsite Sessions

Bringing an Accelerated Reader Implementation Consultant to your school allows you to train as many educators as you wish, each of whom will receive the training simultaneously as the information is presented. This also allows you to plan ahead for the space that is appropriate to the number of planned attendees. And the group benefits from the kind of interaction only a live presentation offers.

Full-day sessions are six hours in length. Half-day sessions are three hours, and require that a minimum of two such sessions be scheduled back-to-back, to comprise a full day of onsite training.

The rate of \$152/hr applies to all sessions, no matter when those sessions are delivered throughout the year. All sessions must be used within one year. An onsite fee of \$2,133 will be added for full-day sessions.

80002C – \$2,133 Onsite Fee
86501C - \$152.40/hr

Remote Sessions

Remote Sessions present the same information that’s available to attendees in Onsite Sessions. You can schedule these telephone and Internet-delivered sessions to meet the varying availability of all participants.

You can order the sessions in as small as single-hour increments, or you can pre-order an entire semester or school year’s worth of training. You can then present such training on a schedule that meets your attendees’ needs, for ultimate flexibility.

Remote session can accommodate a maximum of 14 computer connections.

The rate of \$152/hr applies to all sessions, no matter how and when those sessions are delivered throughout the year. All sessions must be used within one year of order acceptance.

80127C - \$152.40/Hr

Examples Of Some Courses Available For Onsite And Remote Sessions

Accelerated Reader Best Practices – Beginning Topics

Here is the perfect introduction to using Accelerated Reader in your elementary, middle and high school classroom and school. You'll learn practical, classroom-tested ways to foster reading, monitor progress, and intervene effectively to ensure success for each student.

- Getting started with Accelerated Reader
- Knowing your assessment tools
- Proving appropriate practice
- Using reports to monitor reading progress
- Diagnosing and intervening based on data
- Setting goals and motivating learners
- Reviewing data to evaluate your program

Accelerated Reader – Special Audiences

Especially for librarians, Accelerated Reader training addresses:

- Managing quizzes and increased library circulation
- Building and optimizing your library collection
- Creating a culture of reading in your school

Accelerated Reader – Advanced Topics

For those experienced with Accelerated Reader but eager to teach their fullest potential, these advanced topic sessions focus on the critical markers of success for students, the class, and your program. These sessions help you to work toward model classroom status, and highlight:

- Using advanced strategies for selecting books
- Intervening with struggling learners
- Setting classroom goals
- Using Literacy Skills quizzes to promote critical thinking
- Building vocabulary with Accelerated Vocabulary

Accelerated Reader – Special Topics

Choose from an array of topics to learn about using Accelerated Reader with different kinds of learners and in specific settings. You'll learn about:

- Differentiating instruction with Accelerated Reader for specific learners
 - ✓ English language learners
 - ✓ Special needs learners
 - ✓ Learners with exceptional aptitude
- Adapting Accelerated Reader in various settings:
 - ✓ Summer school programs
 - ✓ After-school programs
 - ✓ Non-traditional learning environments

You can choose from one of these courses or design a custom course specifically for your school.

Professional Development

Accelerated Reader professional development programs are offered in several formats so you can take advantage of the methods of training that are right for you.

Seminars

These full-day (six-hour) workshop-style sessions are conducted by experienced Renaissance consultants. You can bring a customized seminar to your school or attend a regional standardized seminar already scheduled in your area.

Webinars

Using the Internet and telephone, you can attend a session that covers a single topic in an hour or less. Choose from standardized sessions or customize sessions to meet your needs.

Consulting

This option includes data reviews, classroom observations, strategic planning, and leadership training to help you improve your implementation with the assistance of a consultant with years of experience in using Accelerated Reader.

Implementation Coaching

Give the designated project leader at your school telephone access to a Renaissance Implementation Coach for an entire year. This coach will help your project leader ensure that implementation goals are met.

Train the Trainer

Develop your own local experts in Renaissance best practices who can provide assistance to the rest of your staff. Combining elements of our other professional development services, Train the Trainer packages can be customized to meet your specific needs.

Alaska, Hawaii and International Orders \$25.40 Surcharge

Special shipping rates will apply to orders outside the continental United States. Rates will be based on weight and distance. Please contact Follett Library Resources for more information.

Rates are per-school charges. Individual orders for more than one school will be assessed a separate processing/shipping charge for each school listed in the order.

All Renaissance Learning prices are subject to change.

Follett Software Reading Program Service Online Subscription

The Reading Program Service Online Subscription allows Destiny® Library Manager or Circulation Plus® (Internet access) users to instantly enhance their library records with reading program information. Follett's Reading Program Service provides visibility and easy searching of books and materials for schools in your district that use one or more of today's popular reading programs, such as Accelerated Reader®, Reading Counts!®, or Lexile®. It works right in your Destiny or Circulation Plus program!

- RPS helps guide each student to their optimal reading zone by reading level, point value and subject.
- Students spend less time searching and more time reading
- Teachers can easily assign books that support individualized, differentiated instruction.
- Schools and districts maximize use of their reading program investments.
- Spend less time cataloging.

http://www.fsc.follett.com/page/reading_program/

Follett Software Reading Program Data Services

Athena, InfoCentre and Circulation Plus Users.

If you use Athena, InfoCentre or Circulation Plus (without Internet access), Follett offers a reading program data service just for you. Whether your school uses Accelerated Reader™, Reading Counts!®, or Lexile®, by uploading your records to Follett, we can update your MARC records with your reading program information.

Your updated records help...

- Students spend less time searching and more time reading.
- Teachers easily assign books that support individualized, differentiated instruction.
- Schools and districts maximize use of their reading program investments.
- Librarians spend less time cataloging.

Receive Four or More Collection Development Reports

Accelerated Reader™, Reading Counts!® customers, in addition to updated MARC records, receive four collection development reports including:

- 'No Quiz' – Have the book, but don't have the quiz.
- 'No Book' – Have the quiz, but don't have the book.
- 'Success' – Have the book and have the quiz.
- 'Summary' – Statistical summary of the reading program data service

Lexile® customers, in addition to updated MARC records, receive a report that identifies titles that were populated with Lexile information in the 521 tag.

http://www.fsc.follett.com/page/reading_program/

Renaissance Place Real Time

Renaissance Place Real Time is our new *hosted* platform of Renaissance Place. The Renaissance Place Real Time platform includes many new features not available in any other platform. The new platform allows Renaissance Learning to dramatically enhance the user experience through less setup, enhanced support, and more importantly the ability to provide new and exciting features as soon as they are available throughout the year. Another great example of the type of things customers can expect from Renaissance Place Real Time is a new customer option for support via live chat!

In the coming days, current hosted customers will begin to receive emails from Renaissance Learning notifying them of the enhancements that they can expect to see when their hosted site is upgraded to the Renaissance Place Real Time platform. Custom installed (non-hosted) Renaissance Place customers will be encouraged to switch to Renaissance Place Real Time in order to benefit from the future products, features, and enhancements that leverage the technological advantages provided by this platform.

Please note: it is important to know that if customers choose to stay with the Custom Install (non-hosted) initially, they can continue to count on Renaissance Learning to provide excellent support for their continued use of that version, just as we have done for our Foundation/Desktop customers. As the exciting enhancements to Renaissance Place Real Time occur, we are sure more and more of our customers will want to switch to Renaissance Place Real Time.

Attached you will find a copy of the latest Renaissance Place Real Time Flyer! To learn more about the new features in all of the Renaissance Place Real Time software editions, please visit: <http://www.renlearn.com/RPRT/whatsnew/>.

AR BookFinder (www.arbookfind.com)

AR BookFinder, the web-based book searching, free online tool from Renaissance Learning, has been updated to incorporate the following new features:

- ➤ The ability for users to see book ratings! Book ratings are based on how students have rated the book in the Accelerated Reader software. The book ratings feature will be updated on a weekly basis. The search results feature has also been updated to allow for sorting by rating.
- ➤ Users who own AR BookGuide can now see their call number information in the My BookBag Report.
